

AMETA
SOLUTION

Belt Spray

70-06

PRODUCT TYPE

Fully synthetic with great adherence.

Especially made for machinery in open or in humid conditions: car, garages, farms, construction yards, industries and machinery maintenances.

Economic in use – Low consumption

UTILISATION

Apply directly on the belt in action in the gearing system.

The **Belt Spray** can be applied on the inferior face of the belt as well.

For the first application, spray a thin film on the entire belt.

To maintain a better performance of the belt, repeat the process frequently.

ADVANTAGES AND PROPERTIES

- Eases the softness of surfaces and eliminates sliding or squeaking.
- Increases belt adherence and transmission performances, especially when started.
- Doesn't contain tar or resins.
- Keeps belts supple and prevents premature aging.
- Increases the performance up to 50%.
- Increases servicing intervals and durability of belts up to 100%.
- Long spray tube allows no direct contact on hands kept at a safe distance from moving parts during application.
- Dust and dirt repellent.

RECOMMENDATIONS

Flammable.

Follow label instructions.
