

**Alu-Silver**

**70-69**

**PRODUCT TYPE**

Non effaceable high quality metallic coating. High gloss chrome effect. Also suitable for furniture, railings, chair-legs, wheel-rims... Adhere to plastics, metal, glass, ceramics and wood. NB: The rougher the surface, the less brilliance can be achieved.

**ADVANTAGES AND PROPERTIES**

- Impact resistant
- Resists severe weather
- Quick drying in 5-6 minutes at room temperature
- Completely dry in 10-15 minutes
- Heat resistant up to 220 °C
- Free of CFC

**DIRECTIONS FOR USE**

The surface to be coated must be clean, dry and free from dust and grease. Shake can well and spray cross-wise thin coatings from a distance of approximately 20 cm. Preferably spray onto a black-primed, very smooth or polished surface made from metal, white plastics used for sanitary items, glass, ceramics. After having applied a first thin film, apply a second thin film after approximately 15 to 20 min. to increase the brilliance. The product is equipped with a self-cleaning valve; do NOT purge after use.
