

Synthetic Fluid

70-01

PRODUCT TYPE

The synthetic fluid is a lubricating product which helps reduce the metal to metal contact. It has the remarkable capacity to cool down metal. Leaves a nice finish and protects the metal against rust.

UTILISATION

The **Synthetic Fluid** is conceived for the industry that transforms metals such as: sawing, drilling, cutting, etc ...

The translucent clearness of the liquid allows the operator to visualize his work.

ADVANTAGES AND PROPERTIES

- Odourless.
- Very resistant to bacterial contamination.
- Developed for carbide working.
- Compatible with nearly all aluminium alloys.
- Doesn't leave any sticky residues.

DIRECTIONS FOR USE

SAWING 1:10 to 1:20
 DRILLING 1:12 to 1:20
 GRINDING 1:10

PHYSICAL PROPERTIES

PHYSIC STATE LIQUID
 ODOR NONE
 DENSITY 1,15g/ml
 PH at 1:20 8,0 – 8,5
 VISCOSITY at 40°C 2 – 4 CST
 REFRACTOMETER 1:20 1,7%

PACKAGING

Description	Format	Product no.
Liquid	4 liters	70-0140
Liquid	10 liters	70-0110
Liquid	20 liters	70-0120
Liquid	205 liters	70-0145
