

## **GALVA-PROTECT**

**70-38**

### **PRODUCT TYPE**

Water based galvanising protection for screw threads, sliding surfaces, etc ... which must be protected from galvanising.

### **UTILISATION**

Clean thoroughly the surfaces with **Rapid Cleaner Spray (Product no. 70-15)** before applying **GALVA-PROTECT** with a brush.

Allow the protective layer to dry for about 2 hours at room temperature. Once dried, the galvanisation process will begin.

After galvanisation, **GALVA-PROTECT** can be easily removed with a wired brush.

### **AVANTAGES AND PROPERTIES**

- One single application is sufficient.
- Does not interfere with the process of galvanisation.
- Resists a temperature of 800°C.

### **RECOMMENDATIONS**

Protect from frost.  
Non flammable.
