

STAINLESS-STEEL

70-56

PRODUCT TYPE

Special highly effective spray for stainless steel, glazed and smooth plastic surfaces.

UTILISATION

Treated areas should be free of oil, grease and dirt.
Parts already painted or varnished in good condition can be sprayed.
The spray can be applied on all clean metallic surfaces.
Shake well before use.

AVANTAGES AND PROPERTIES

- The Steel Spray coating combines the advantages of an alloy rich, stainless steel and waterproof synthetic resin gives the surface a metallic finish.
- Leaves a shining aspect similar to stainless steel brushes.
- Heat resistant up to 300°C when the coat is dry.
- It's not paint but a metallic suspension in spray.
- High resistance to acids, alkalies and other aggressive agents.
- **Alloy content:** 18% chrome, 8% nickel and 2% manganese.

RECOMMENDATIONS

Flammable.
Follow label instructions.
